- Collect, clean, and validate structured and unstructured datasets
- Perform exploratory data analysis (EDA) to identify patterns and anomalies
- Develop dashboards and reports using BI tools
- Interpret data and present findings to stakeholders
- Write optimized SQL queries for large datasets
- Support business teams with ad-hoc analysis
- Automate repetitive reporting tasks

Required Skills

- SQL
- Python or R
- Advanced Excel
- Data Visualization (Power BI / Tableau)
- Statistics & Probability
- Data Cleaning
- Pandas / NumPy

Preferred Skills

- Basic Machine Learning knowledge
 - Experience with cloud platforms (AWS/GCP/Azure)
 - ETL pipelines
-

Qualifications

- Bachelor's degree in Computer Science, Statistics, Mathematics, Economics, or related field
-

What We Offer

- Fast-paced learning environment
- Mentorship from senior analysts
- Opportunity to work on real-world datasets
