## ATS Optimization Tips for Sakshi:

1. **Keywords:** Ensure you include specific tools you know (like Jira, SQL, or Tableau) as these are often scanned for by filters.
2. **No Graphics:** Avoid tables (within the doc), columns, or images. ATS software reads top-to-bottom and can get "stuck" on complex layouts.
3. **Action Verbs:** Start your bullet points with strong verbs like *Spearheaded*, *Developed*, *Analyzed*, and *Negotiated*.
4. **Quantify:** Use numbers (% , \$ , hours) as much as possible to show impact.
